## EXPERIENCE

### Summer 2019

1 week

Blueberry Consultants • Work Experience • Birmingham, UK

- Developed software to synchronise contacts from multiple email accounts using Gmail and Outlook APIs.
- Improved the efficiency of and added comments to a legacy program for use by future developers

### Summer 2017

1 week

Daden • Work Experience • Birmingham, UK

- Built a UI for a virtual assistant using JavaScript
- Created 3D models and transferred them into Unity for use in a VR application
- Tested VR software finding major and minor bugs and writing up corresponding documentation

### Summer 2017

1 week

Vanti • Work Experience • Birmingham, UK

- Assembled AV equipment for use at the Royal Birmingham Conservatoire
- Aided development of a company Slackbot for admin purposes
- Assisted development of batch files to automate set-up of new devices

## PROJECTS

### Hack the Midlands

- Created a version of the game Pong played using only face detection and presented in front of an auditorium of 300+
- Helped the development of a 3D game in Unity
- Won a prize awarded by Majestic

### Twitter sentiment analysis

- Developed a program to monitor the perception of a topic on Twitter, using tweepy API for Python and nltk library
- Graphically displays the average recent perception to show how perception changes over time

### Google Maps running route maker

- Wrote program to generate a random running route of a specified length, using Google Maps distance API
